Rooibos sau ceaiul rosu este un ceai natural, fara cafeina, bogat in antioxidanti, care ocupa un loc foarte important intre celelalte ceaiuri.

Provine de la un arbust care creste doar in Africa de Sud si are frunze verzi, lucioase, care devin rosii dupa procesare.

Se poate consuma in orice moment al zilei datorita faptului ca nu contine teina.

Ceaiul Oolong este un ceai semi-fermentat mai puțin bogat în teină decât ceaiurile verzi, aflat undeva între ceaiul verde nefermentat și ceaiul negru complet oxidat.

Un amestec de ceai negru si verde ce fac sa rezulte o bautura cu efect energizant dar si cu multiple beneficii pentru sanatate.

Infuziile de plante au acelasi aspect ca si ceaiul si se prepara, in principiu ca si ceaiul, folosind apa fierbinte.

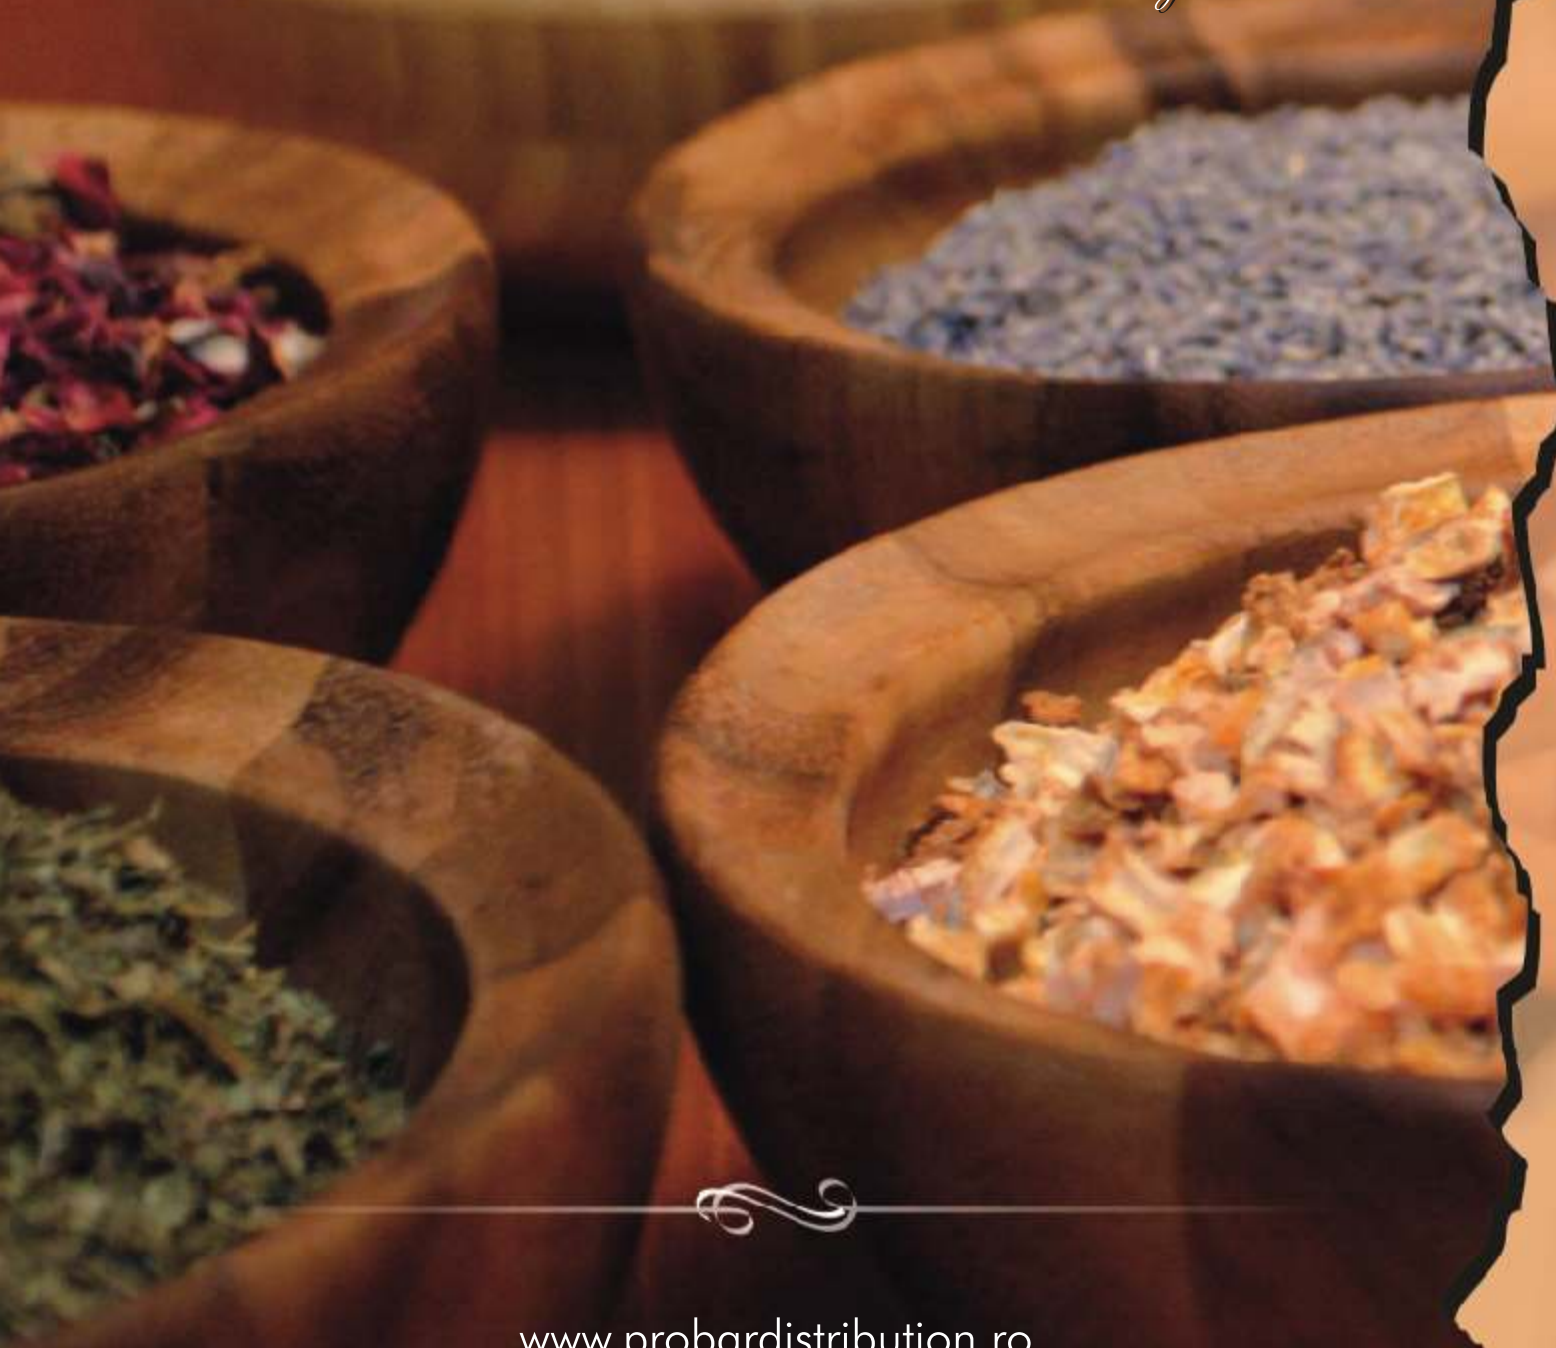

Pot contine frunze uscate, bucati de fructe coapte, flori, ierburi si alte plante care sa aromatizeze bautura si sa ofere o serie de avantaje in urma consumului lor.

Spre deosebire de alte tipuri de ceai, infuziile din plante nu contin .

Au un gust minunat si sunt usor de baut.

Ceaiul din plante poate consta dintr-un singur ingredient principal pe baza de plante sau dintr-un amestec de ingrediente.

Rolul acestuia este sa relaxeze, sa hidrateze si sa revigoreze.
